

Access your Home Drive from OS X!

Step 1 - Setting Up Software

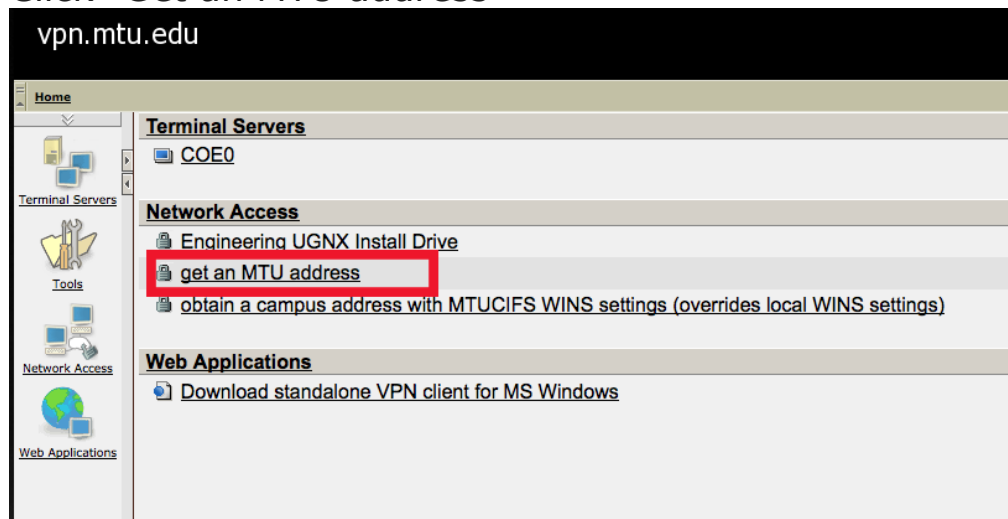

- Open either Safari or Firefox
- Go to vpn.mtu.edu

- Enter your Michigan Tech ISO username and password

- Click "Get an MTU address"

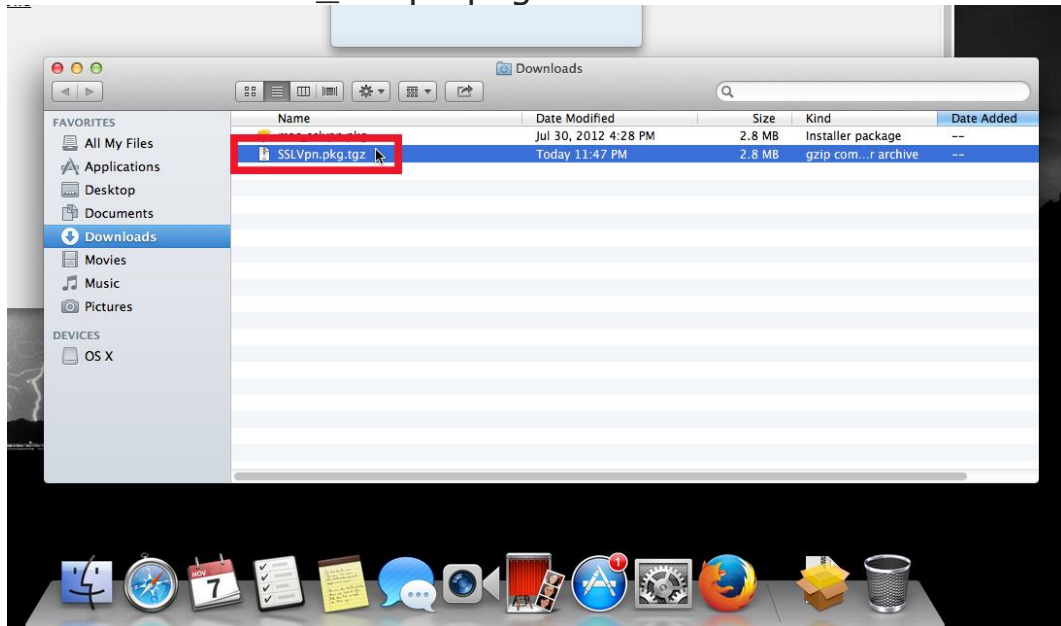

- A Window will appear that will say: "Installing Network Access for the first time"

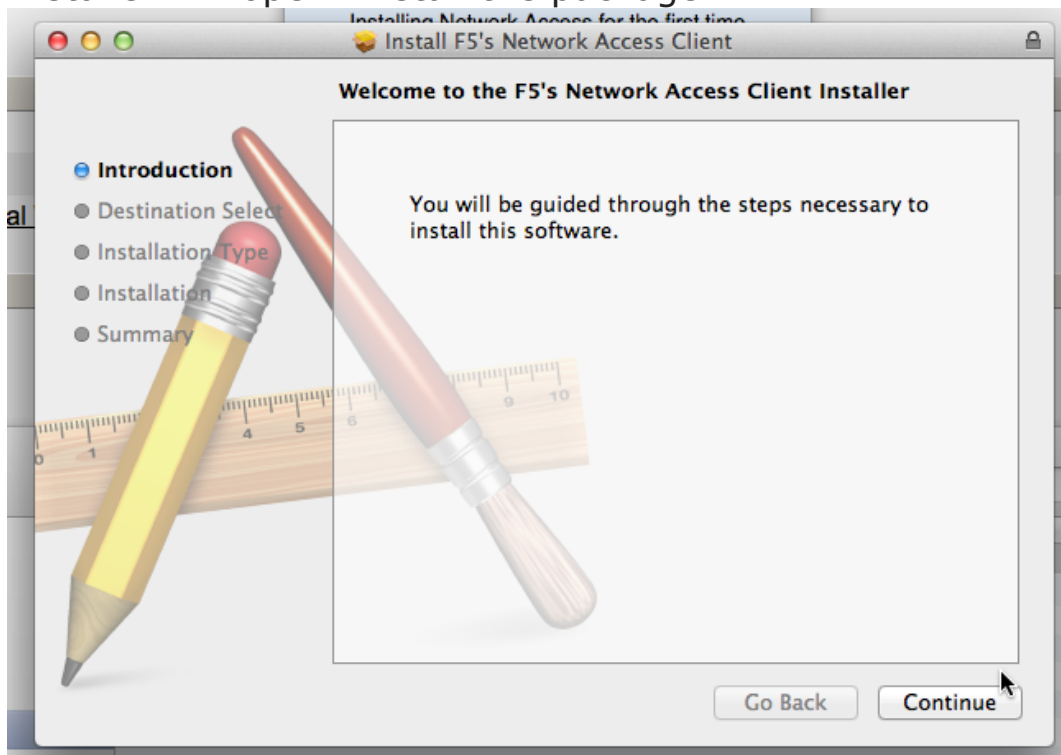

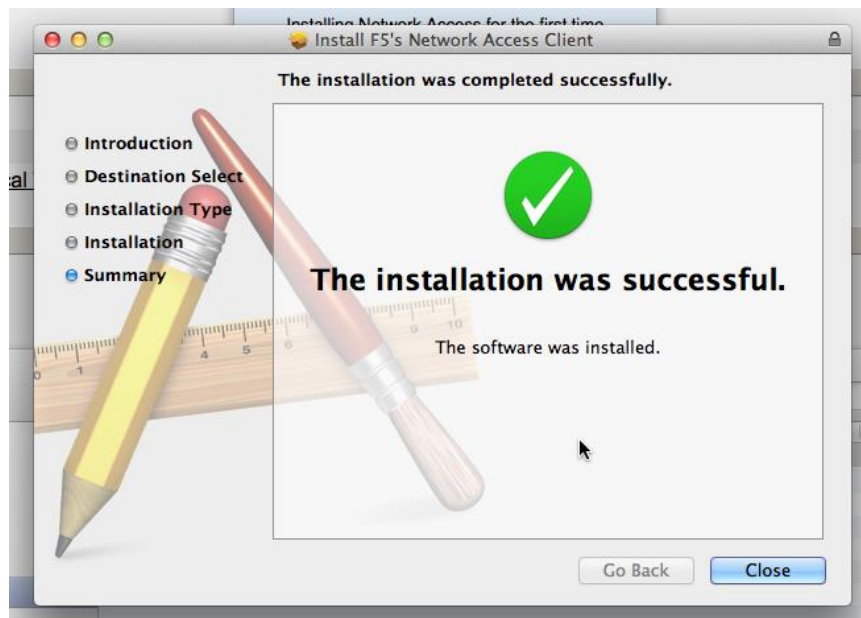

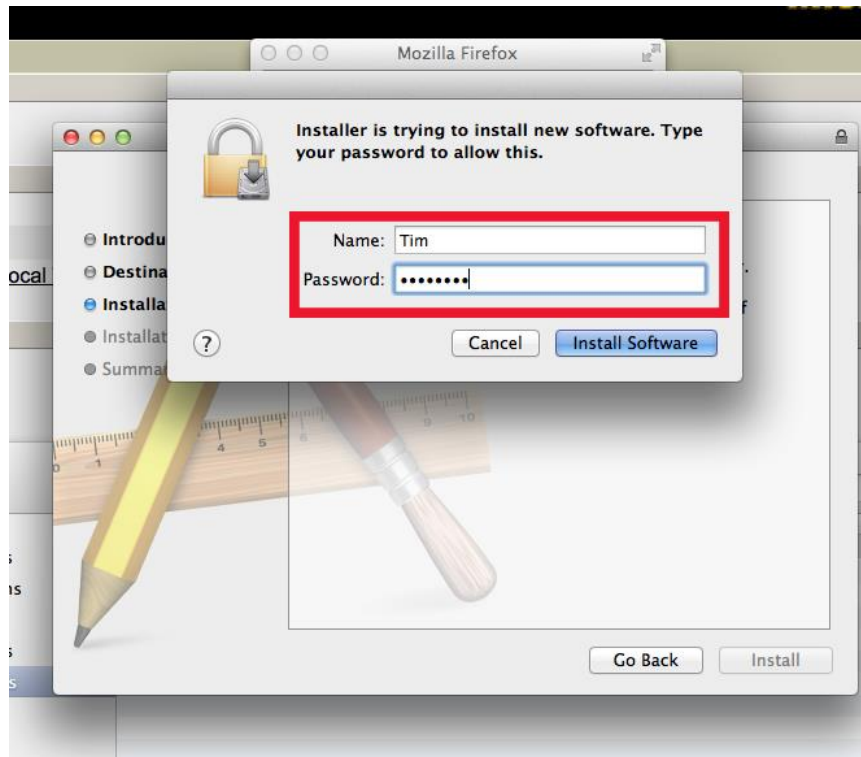

- Download the standalone installer

- Go to Download folder, and open the file. This will Extract a file called "mac_sslvpn.pkg". Click the new file

- Installer will open. Install the package.

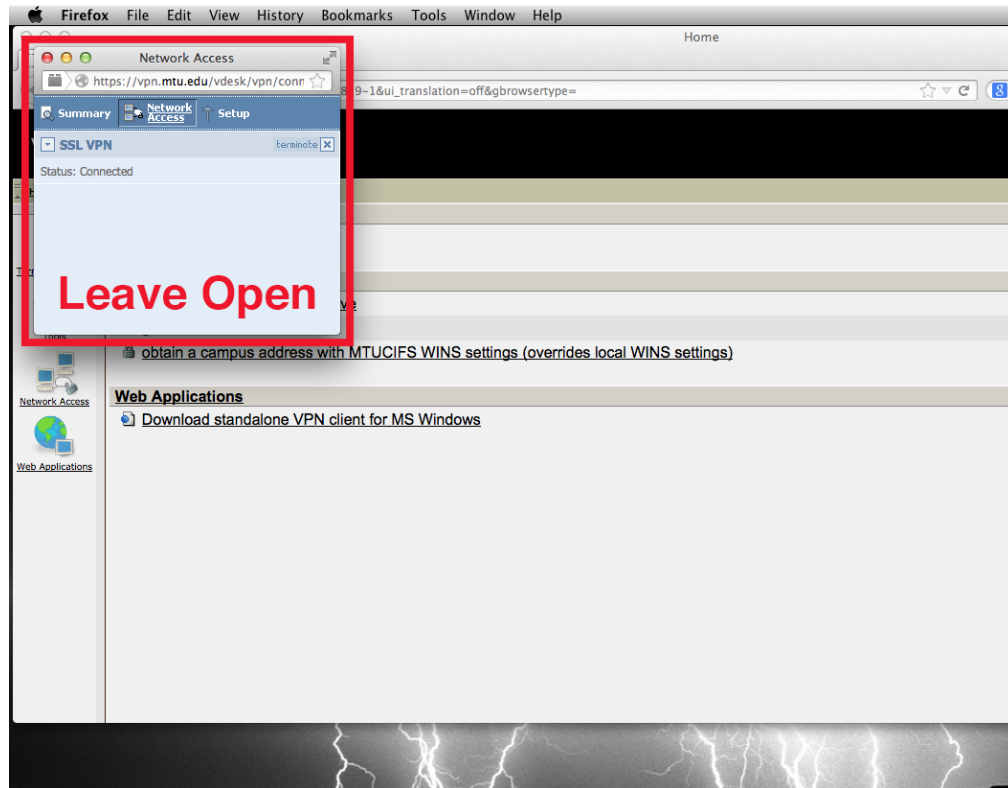

- Quit your webbrowser completely. Press Command(⌘)-Q.

Step 2 - Connecting to Michigan Tech

- Open either Safari or Firefox
- Go to vpn.mtu.edu

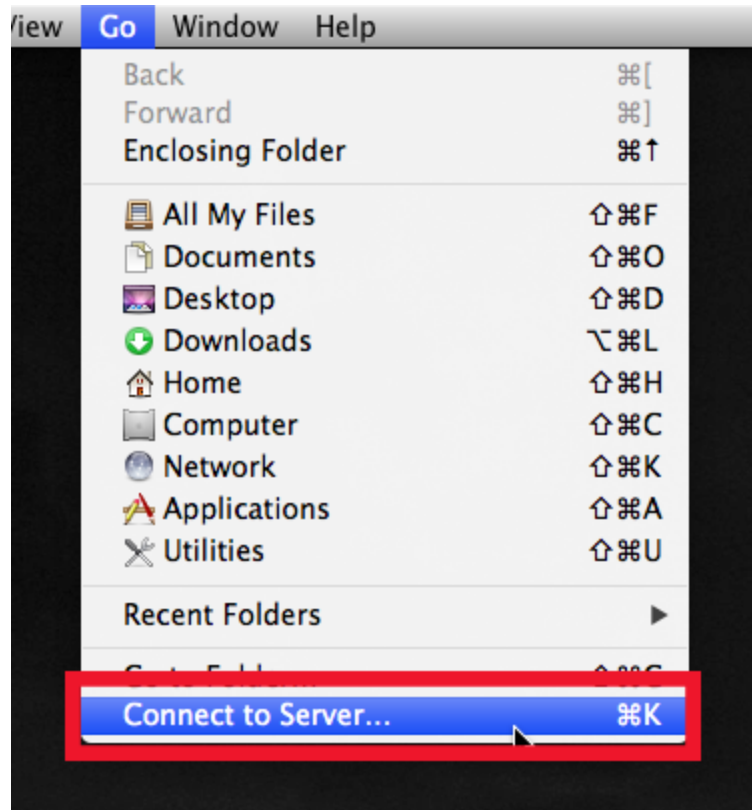

- Enter your Michigan Tech ISO username and password
- Click "Get an MTU address"
 - This will open a small window like last time, however this time the window connect to Michigan Tech

- Wait until the status says "Connected"
- Leave that window open; if you close it, you will lose your connect to the Michigan Tech Network. Minimizing the window will not affect the connection, you just cannot close out the window.

Step 3 - Connecting to the Home Drive

- Open Finder
- On the top bar, click "Go", then "Connect to Server"
 - This can be done by pressing ⌘-K

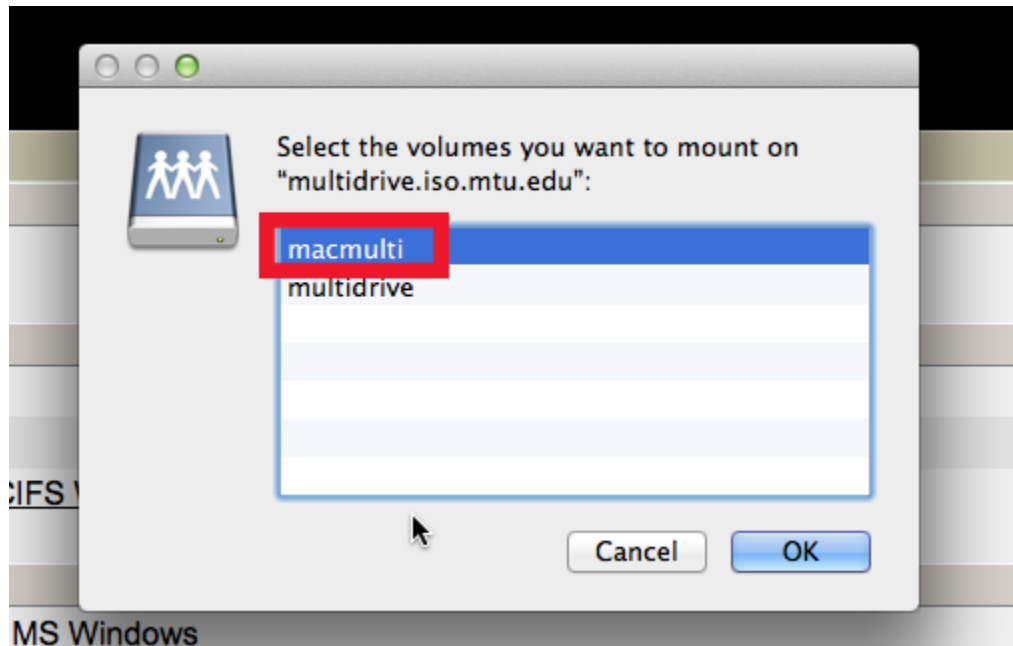

- In the Server Address field, type:
"smb://multidrive.iso.mtu.edu"

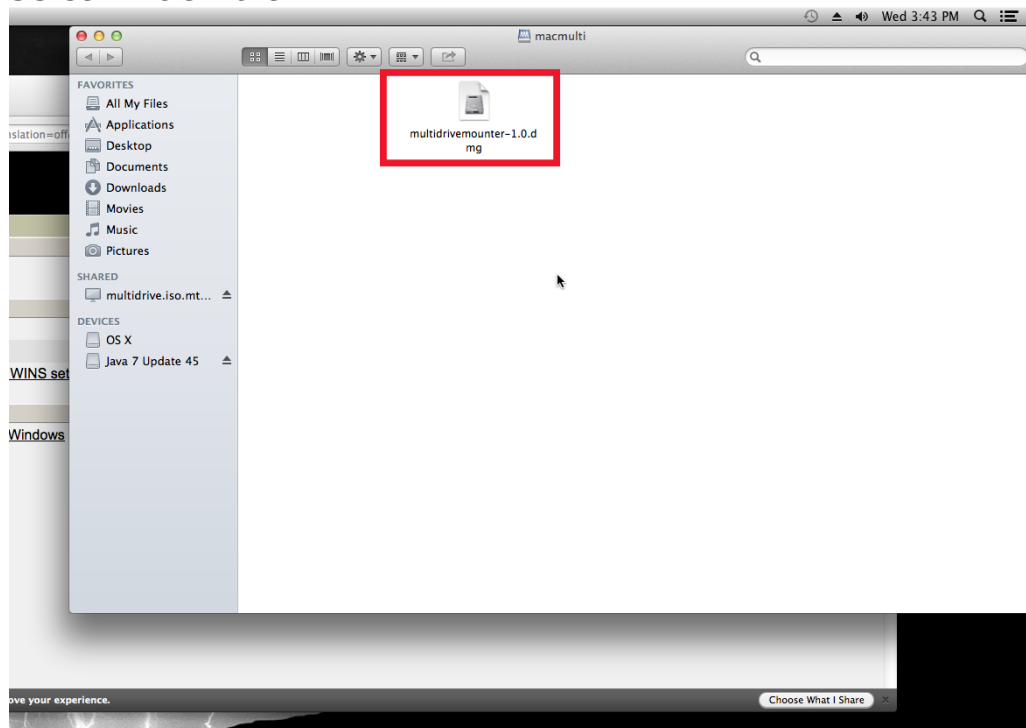

- Type in your Michigan Tech Username and Password

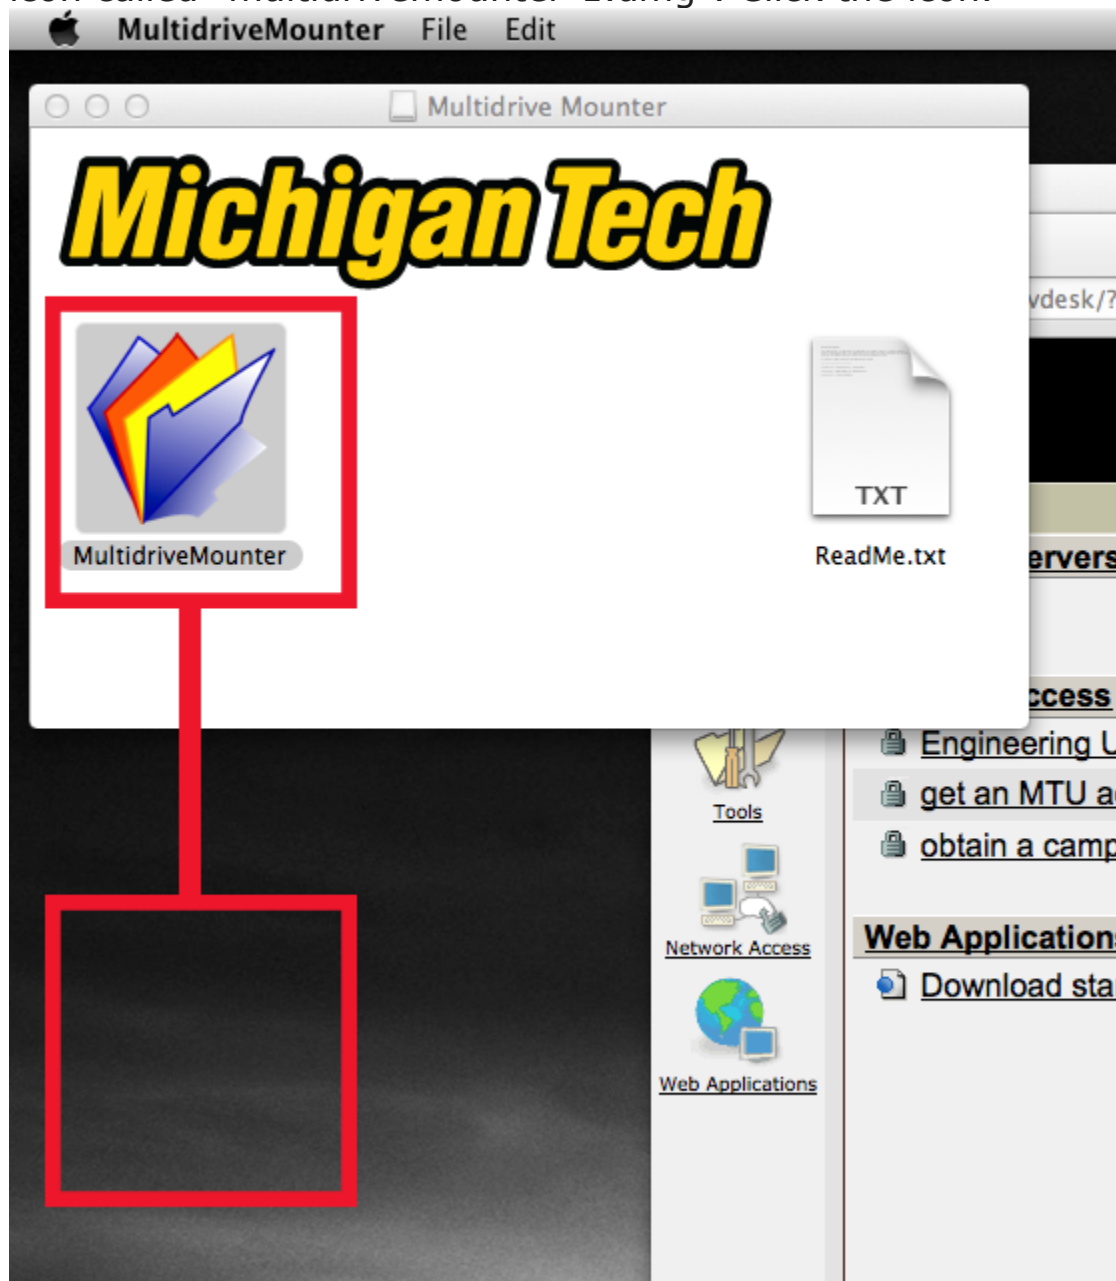

- Your Username should be preceded by "MTU\"

- A Window will appear asking you what volume to mount, select "macmulti"

- After that is mounted, you should see a window with a icon called "multidrivemounter-1.dmg". Click the icon.

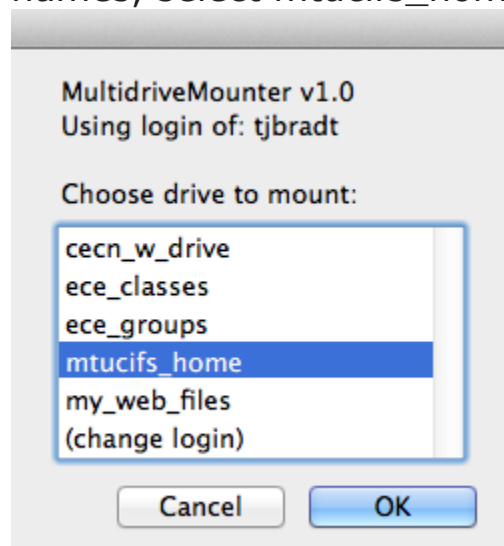

- Another window will open containing a README and a Package called "Multidrive Mounter." Drag the Package to

your desktop. Click on it.

- You will be prompted for your MTU Username. This will **NOT** contain the "MTU\"
- A Window will pop up, this will contain various drive names, select mtucifs_home and press OK.

- You are now connected to your home drive. Use Finder to navigate to your drive

Connecting to the Home Drive afterwards

- Connect to the Michigan Tech Network following the steps from step 2.

- Use the Multidrive Mounter to connect to mtucifs_home. This time it will ask you for your password. You can select for your computer to remember your password.
- You are now connected to your home drive. Use Finder to navigate to your drive
